Experience

Freshworks

Aug 2025 – Present

Senior Software Engineer

Chennai, India

- Developed and stabilized React-based widget JWT authentication by implementing automatic message retry on token expiry, significantly improving reliability.
- Optimized React widget error logging by reducing Sentry attachment size by over 50%, lowering storage overhead and improving monitoring efficiency.
- Enhanced user experience by introducing micro-interactions, resulting in smoother widget transitions.
- Strengthened the React-based IP Restriction feature by implementing robust client-side validations and preventing duplicate entries across four IP types.
- Collaborated with the mobile team to enable widget reuse on iOS and Android via iframe integration.

Mr.Cooper

Apr 2025 – Jul 2025

Software Engineer II

Chennai, India

- Developed a React and Node.js-based application delivering web services for customers with consumer loans.
- Implemented the biweekly autopay feature using React and Redux, allowing customers to make 26 payments a year.

Mr.Cooper

Jul 2022 – Mar 2025

Software Engineer I

Chennai, India

- Developed a Multi-Factor Authentication (MFA) feature for a web application using React Redux and Ruby on Rails, enhancing security for over **60,000** customers in production.
- Collaborated with team members to create and launch website services for 5 other companies, boosting the company's revenue.
- Used Cron to schedule and send quarterly detailed reports on ideas via Node APIs and their statuses to all employees.

Mr.Cooper

Jan 2022 – Jun 2022

Software Engineer Intern

Chennai, India

- Developed **automation** scripts for generating files to offer white-label website services for other companies.
- Integrated Jenkins build results with Microsoft Teams using webhooks for success or failure notifications.

Education

SSN College Of Engineering

Aug. 2018 – May 2022

Bachelor of Technology in Information Technology

CGPA: 8.9/10

Projects

Blog Website | MongoDB, Express, Node JS

May 2021

- Developed a Blog Website Application allowing the users to upload or delete their blogs and view the blogs submitted by other users.
- Designed a sign-in form enabling account creation and login, with encrypted passwords stored in the database.

Paddy Disease Detection | Machine Learning

June 2022

- Developed a machine learning model to classify paddy leaves as healthy or affected by one of three specific diseases.
- Implemented the K-Means algorithm for clustering data based on the type of paddy leaf disease.
- Trained the model using datasets from Kaggle and achieved over 90% accuracy when tested with real-life data.

Technical Skills

- * **Languages:** JavaScript, HTML/CSS, SQL, C++, Java, Python
- * **Technologies/Frameworks:** React JS, Redux, Node JS, Next JS, Typescript, Ruby on Rails
- * **AI Tools:** Cursor, Kiro, Copilot

Certifications / Achievements

- * Awarded **"Rookie Rockstar"** at Freshworks for impactful contributions to the widget within the first month of joining.
- * Solved **600+** problems on LeetCode, demonstrating strong problem-solving and algorithmic skills.
- * Completed NPTEL certifications in Programming in Java and Social Networks.
- * Secured 2nd place in "Code IT", an intra-college coding competition organized by the Department of Information Technology.
